## Verbal Description:

This multichamber candelero has evidence of at least 3 round chambers with slanted, flat bottoms. There is one complete chamber which has a large vent hole (.45 cm diameter) punched through the corner of the outer wall 1.7cm from the bottom of the support. Around the rim of this chamber there is a slab-handle-like applied piece of clay, 2.8 cm long, with 8 vertical incisions on the top. Between this chamber and the one on the left or right there are oval applied pieces of clay near the rim with diagonal incisions. The piece is heavily eroded - difficult to determine any burning.
